EMPLOYMENT

Software Engineer **Jul 2017 – present**

Vonex Telecom

Richmond, VIC (*previously Circular Quay, NSW*)

Team Size: 10

- Hired initially to assist lead developer in integrating Vue.js into legacy JS/jQuery codebase to meet feature requests as proposed by client
- During lead developer holiday over Christmas 2017, was primary liaison between company and ASX listed client for high priority PBX (phone provisioning) software

- Became lead front end developer for company's new product, Oper8tor, encompassing creation of associated front-end projects, championing of ESLint and testing framework configuration and evolution, and the training of newly hired front end developers on codebases & associated technologies
- Conducted all front-end developer interviews to date, including ad copy & design, initial screening and subsequent face to face assessments
- Relocated to Melbourne following company office move and expansion

Front End Developer
Online Marketing Gurus
Pymont, NSW

Jun 2017 – Nov 2017
